Source Document Reference: Public Record Office RG 10 / 1993

The 'YoB' column does not appear on the census. The column indicates approximate Year of Birth derived from the age stated on the census.

The 'Children' column shows three numbers - the first is total children born to that marriage as at the census date, followed by number then alive and number then dead

*Important: As census schedules were completed by individual householders in their own handwriting, sometimes they can be difficult to read and while this transcription aims to be as accurate as possible it should not be relied upon. Always check original schedules.*
